

Long-term Returns

The market has moved higher over the years but not in a straight line. There is no guarantee that the market will always trend up, but if history is any guide, long-term investing has the potential to be a successful strategy - especially when paired with a diversified portfolio that is not too concentrated in any one asset class.

Small-company Stocks represented by the IA SBBI U.S. Small Stock TR Index.

Large-company Stocks represented by the IA SBBI U.S. Large Stock TR Index.

Long-term Government Bonds represented by the IA SBBI U.S. Long-term Government Bonds TR Index.

U.S. Treasury Bills represented by the IA SBBI U.S. 30-Day Treasury Bill TR Index.

Inflation represented by the IA SBBI U.S. Inflation Index.

Compound Annual Return (1926-2018)

Small-company Stocks	11.9%
Large-company Stocks	10.2%
Long-term Government Bonds	5.5%
U.S. Treasury Bills	3.3%
Inflation	2.9%

Past performance is not a guarantee of future results. Hypothetical value of \$1 invested at the beginning of 1926. Assumes reinvestment of income and no transaction costs or taxes. This is for illustrative purposes only and not indicative of any investment. Indexes are unmanaged and are not available for direct investment. © 2018 Morningstar Direct. All rights reserved. An investment in stocks will fluctuate with market conditions and may be worth more or less than the original investment when sold. Small-cap stocks carry greater risk and have greater market fluctuation than large-company stocks. Treasury bills and government bonds are guaranteed by the U.S. government and, if held to maturity, offer a fixed rate of return and fixed principal value. Fees, commissions and charges are not included and would have a negative impact on investment performance.

What History Teaches Us about Investing for the Long Term

Throughout history, America has experienced war, economic uncertainty and political upheaval. But regardless of setbacks, our financial markets have prospered over the long term. Although we can't predict the future, sometimes it helps to look at the past to understand that market ups and downs are a normal part of investing. It's reassuring to see that we've almost always "been here before," which can help you focus on strategies that take advantage of the current environment rather than merely reacting to it.
